SWEDISH MASSAGE

A light to medium pressure massage focusing on circulation & the movement of lymph throughout the body. Great for stress related conditions, chronic pain & anxiety.

DEEP TISSUE

A deeper pressure massage focusing on breaking down the adhesions that can block circulation, cause pain, limited movement & inflammation. Concentrated pressure releases muscle tension, provides deep pain relief, loosens scar tissue & lengthens muscles.

PRENATAL MASSAGE

Is especially designed for expectant mothers. Our therapists will take extra care to make sure your body gets the cushioning & support it needs. Prenatal massage promotes relaxation, soothes nerves, reduces fatigue & relieves strained back & leg muscles.

HOT STONE MASSAGE

A specialty massage where our therapist uses smooth, heated stones by applying them on the body. The heat can be both deeply relaxing & helps warm deeper muscles so that the therapist can work more deeply. Beneficial for sore & overworked muscles.
